

data/exceptions/entitynotuniqueexception.h

```
graph TD; A["data/exceptions/entitynotuniqueexception.h"] --> B["QString"]; A --> C["exception"];
```

The diagram illustrates the dependencies of the header file `data/exceptions/entitynotuniqueexception.h`. Two blue arrows originate from the bottom of the header file box and point to two separate boxes below it: `QString` on the left and `exception` on the right.

QString

exception
