

model/exceptions/propertynotvalidexception.h

```
graph TD; A[model/exceptions/propertynotvalidexception.h] --> B[QString]; A --> C[exception];
```

The diagram illustrates a header file path, `model/exceptions/propertynotvalidexception.h`, which is shown in a grey rectangular box at the top. Two blue arrows originate from the bottom center of this box and point downwards to two separate white rectangular boxes. The left box contains the text `QString`, and the right box contains the text `exception`. This visualizes the relationship between the header file and the components it likely defines or uses.

QString

exception
